

How It Works

1

Go online or call the toll-free number to create your account.

2

Fill out your medical history and describe your symptoms online or over the phone with a trained DialCare representative.

3

Request a video or telephonic consultation with a DialCare physician.

4

A DialCare physician will accept and perform the requested consultation.

5

If the DialCare physician has authorized a prescription, you can pick up your medication at your local pharmacy.
